^aRegions are those defined in the *Mississippi Timber Price Report*

^bHardwood sawlog average prices were calculated using mixed hardwood and oak sawtimber prices from the *Mississippi Timber Price Report*.

The hardwood sawlog average prices are based on the assumption that Mississippi's hardwood sawmills cut 70% oak and 30% other species primarily yellow poplar, and sweetgum in 1999. Therefore, the hardwood sawlog average price for each region was calculated using the following formula: Regional hardwood sawlog prices = .7 {average regional oak price} + .3 [average regional mixed hardwood price].

⁴Prices from Timber Mart South.

⁵Price estimates by consultation with industry contacts.

⁶Calculated at 44.63 board feet per 7" x 9" x 8.5' tie.

⁷Estimate in cooperation with the LA-MS Christmas Tree Association and individual growers.

⁸The average Christmas tree is assumed to be 6 to 8 feet tall.

⁹Standing price is the estimated average wholesale Christmas tree price to growers.

¹⁰Delivered price is the estimated average price paid for a "choose and cut" Christmas tree.

¹¹Plywood and hardwood veneer log volumes estimated by veneer mill survey and consultation with industry contacts.
