List Abnormalities

SEMEN EXAMINATION

Morphology

% Normal Sperm

MOTILITY

% Individual Motility

OR

Characterization of Gross Motility

All bulls must have documentation of a passed breeding soundness exam, including scrotal measurements within 30 days prior to sale. Minimum scrotal circumference measurements:

12-16 months old----	32 cm
17-23 months old----	34 cm
24+ months old-----	36 cm

Based on recognized industry standards for Bovine Breeding Soundness Examinations as set forth by the Society for Theriogenology I classify this bull as a satisfactory potential breeder. Bulls must meet minimum criteria in all areas.
