

2008 – 2009

South  
Mississippi

**Gain-On-Forage Bull Test Summary  
And Private Treaty Bull Sale Listing**

The Mississippi State University Extension Service conducted its **Twenty-third Annual South Mississippi Gain-On-Forage Bull Test** in cooperation with Test Manager Frank Holmes at the HHH Farms Bull Test Facility near Tylertown, Mississippi November 24, 2008 through April 13, 2009.

Our 2008-2009 Test featured:

40 bulls

consigned by 5 Breeders

- 31 Angus
- 1 Beefmaster
- 2 Gelbvieh ■ 1 Gelbvieh Balancer
- 4 Red Brangus
- 1 South Poll

- Evans Angus Farm • Greenwood, MS
- J. A. Girgenti – J G Ranch • Amite, LA
- doLally Cattle Company • Summit, MS
- Bayou Frais Red Brangus • Long Beach, MS
- C Curb Farm • Brooksville, MS

Table 1 summarizes performance of the bulls during the 140-day Test:

2008 – 2009 South Mississippi Gain-On-Forage Bull Test Final Report • Page 2 of 2-

The South Mississippi Gain-On-Forage Bull Test Committee (hereafter cited as “Bull Test Committee”) made the decision to restructure the focus of the Bull Testing Program effective with the 2007-2008 Test. In focusing upon providing beef seedstock producers an ideal opportunity to evaluate performance of their bulls grazing pasture forages in a controlled testing program, **the decision was made not to conduct an organized South Mississippi Forage-Tested Bull Sale.** However; in upholding our longstanding objective of providing opportunities for commercial cattle producers to purchase forage produced, performance proven, rugged, high quality, genetically superior herd sires; the Bull Test Committee is poised to offer eligible bulls for sale via **PRIVATE TREATY SALE arrangements.**

**\$\$ ~ \$\$ ~ \$\$ ~ \$\$**

**South Mississippi Gain-On-Forage Bull Test Private Treaty Sale Arrangements**

A. It is neither the responsibility nor the right of the South Mississippi Gain-On-Forage Bull Test to negotiate private treaty sale agreements. It is the obligation of the seller and buyer to negotiate terms and conditions of private treaty sale transactions. The South Mississippi Gain-On-Forage Bull Test makes no warranty or guarantee of any kind or nature on bulls enrolled in the Test that are purchased via private treaty transactions.

B. Bulls sold via private treaty will meet the following eligibility requirements:

- 1) Registered bulls must be registered through the appropriate breed association; bulls of composite breeding must be approved for sale by the South Mississippi Gain-On-Forage Bull Test Committee.
- 2) Minimum adjusted 205-day weight shall be 500 pounds.
- 3) Passage of Breeding Soundness Evaluation (BSE). Bulls selling via private treaty must pass a breeding soundness evaluation administered by a licensed veterinarian indicating fertility. Fees for the BSE are borne by the breeder. Each bull is guaranteed by the consignor to be fertile for a period of 60 days from date of sale, provided the bull is properly utilized, receives adequate care, and remains free of injury. The South Mississippi Gain-On-Forage Bull Test makes no warranty or guarantee of any kind or nature on bulls enrolled in the Test that are purchased via private treaty sale arrangements.

**\$\$ ~ \$\$ ~ \$\$ ~ \$\$**

**Persons interested in purchasing one or more  
of these bulls should inquire by  
contacting Test Manager  
Frank Holmes via telephone:  
601-876-5204**

**The following bulls have met sale requirements  
established by the Bull Test Committee  
and are being offered for  
PRIVATE TREATY SALE by the breeder.**

**RECOMMENDATIONS FOR BULLS PURCHASED VIA PRIVATE TREATY SALE ARRANGEMENTS:**

By: Larry DeMuth, Retired Livestock Specialist, Mississippi State University Extension Service • For More Information, Contact: Lamar Adams, Walthall County Extension Director • 250 Ball Avenue • Tylertown, MS 39667 • Telephone: 601-876-4021 • e-mail: lamara@ext.msstate.edu

- Remember, these are young bulls that are still growing and developing.
- These bulls have been developing on well-fertilized forage grasses and small grain grazing. It takes **10 to 14 days** for bulls to adjust to different diets. If you do not have adequate pasture grass at the time you purchase a bull(s) eligible for sale after completion of the South Mississippi Gain-On-Forage Bull Test via a private treaty sale arrangement(s) with the breeder, you need to provide plenty of good quality hay and 5 to 8 pounds of grain per head per day. This will keep the bull growing and developing to your satisfaction, until good summer pasture grass is available.
- Young bulls completing the South Mississippi Gain-On-Forage Bull Test Program should be able to breed 15 to 20 cows this spring. **DO NOT EXPECT HIM TO SUCCESSFULLY BREED 25 TO 30 COWS** – he is not old enough; this requires a solid two-year-old bull.
- DO NOT NEGLECT THE BULL ALL SUMMER.** Remove the bull(s) from cows after 60 to 90 days (before July 15th), deworm and put him on good grass pasture. Preferably feed him 10 to 15 pounds of grain per day. This will allow the bull to continue maturing and developing to your satisfaction.

Persons interested in purchasing one or more of these bulls should inquire by contacting  
 Test Manager Frank Holmes via telephone: 601-876-5204.
