**On the Cover**

Agriculture is a diverse industry in Mississippi and MAFES research touches everything from blueberries to beef cattle.

**Back Cover**

MAFES facilities are located throughout the state

**4 Financial Reports**

Funding partners help keep Mississippi a leading state in agricultural research.

**6 Row Crops**

Applying new techniques to traditional crops is a basic part of MAFES research.

**8 Horticulture**

Virtually all aspects of life are touched by horticulture, from the fruits and vegetables we eat to the plants that decorate our homes. MAFES research plays an important support role for Mississippi's horticultural enterprises.

**10 Livestock**

MAFES research with nutrition, animal health and other management practices provides support for Mississippi's dairy and livestock producers.

**12 Catfish and Poultry**

Record-setting growth has created challenges for the state's catfish and poultry industries, and research is helping producers meet those challenges.

**14 New Technology**

The technological revolution is making new tools available to agriculture, and MAFES research is helping producers adapt those tools to their needs.

**16 Social Research**

There's more to rural life than just crops and livestock. Research is helping rural communities meet the needs of their residents.

**18 Research Outside the Box**

Consumer demand for new products can create new agricultural enterprises that may require some innovative research.

**20 Food Research**

Food safety and adding value to Mississippi farm products are important aspects of MAFES food research.

**22 Selected MAFES Publications**
